

ÅSGARD-INNOVATION PROGRAMME Laureates 2017

Surname	First Name	Area	Organization
---------	------------	------	--------------

Laureates

CADIOU	Jean-Charles	Energy	CAPACITES Université de Nantes
VINCE	Florent	Energy	WEAMEC
RENAUDIN	Sophie	Health	APHP

Complementary List

BERTRAND	Francis	Environment and Climate	Pôle de compétitivité DREAM Eaux et Milieux
MOUGIN	Bruno	Textiles	TECHTERA
BEITONE	Lionel	Energy	SATT Nord

Jean-Charles CADIOU

Jean-Charles Cadiou is the executive president of CAPACITÉS, a structure created by the University of Nantes to enhance cooperations between laboratories and companies. CAPACITÉS works at all innovation levels, from the research stage to mature products. With a strong focus on technologies, CAPACITÉS works together with other structures such as the SATT Grand Ouest, specialized in the commercial approach. CAPACITÉS has an expertise over 9 economic sectors and employs currently 90 advisors.

Florent VINCE

Florent Vince is a project manager for WeAMEC (West Atlantic Marine Energy Center), a structure that gathers universities, research institutes and industrials in the west part of France. Florent Vince is in charge of European collaboration in marine renewable energy.

Sophie RENAUDIN

Sophie Renaudin is an advisor for the Office of Transfer of Technology and Industrial Partnerships (OTT&PI) within the APHP (Public Assistance – Paris Hospitals). APHP gathers 39 teaching hospitals, and around 1000 research projects are carried out. OTT&PI provides economical and juridical support to help innovations that come up from research projects to reach a mature stage. Sophie Renaudin is among others in charge of developing institutional partnerships. She is an expert in negotiating technological transfer agreements and in projects dealing with no-patentable innovation.

Francis BERTRAND

Francis Bertrand is a project manager in the Competitiveness Cluster DREAM (Sustainability of water resources and water environments). The Pole works on ecotechnologies related to water: diagnostic and monitoring, ecological engineering and water and soil treatments. It is active in the regions Centre and Val-de-Loire and works together with two other poles dedicated to water. They represent around 750 companies and research institutes, as well as local authorities and state organisations.

Bruno MOUGIN

Bruno Mougin works as a project advisor for the Competitiveness cluster Techtera in Lyon. The cluster develops projects on Smart Textiles, used for the sector of transports, protective equipment, health, building renovations and luxury sector. The cluster manages several technological platforms giving access to state-of-the-art technologies related to textile and carry calls for projects on various topics, including bilateral calls. Bruno Mougin is in charge of the European and International activities of the cluster.

Lionel BEITONE

Lionel Beitone is project manager in the SATT Nord, within the Physics-Chemistry Materials theme group. He is a specialist in biomass issues and material chemistry. Through its 6 theme groups, the SATT Nord support local companies – especially small ones - to identify high potentials technologies and find the right partner for R&D projects.
